

Capstone Project I: Mutual Fund Analytics

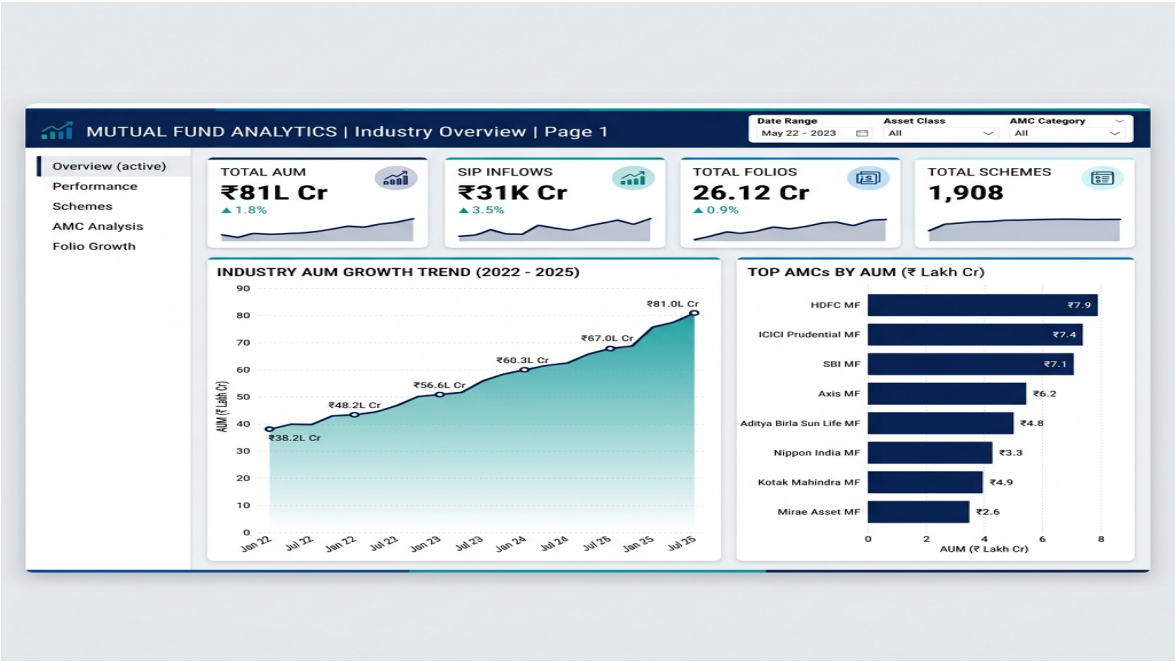

Day 5 Report — Dashboard Development (Power BI)

Executive Summary

This report summarizes the design, visual layout, and configurations of the Power BI dashboard built for Mutual Fund Analytics. The dashboard is structured into 4 interactive reports to deliver clean, conformed business insights. Each page layout is detailed on the subsequent pages, showing the visual elements, key metrics, and design themes.

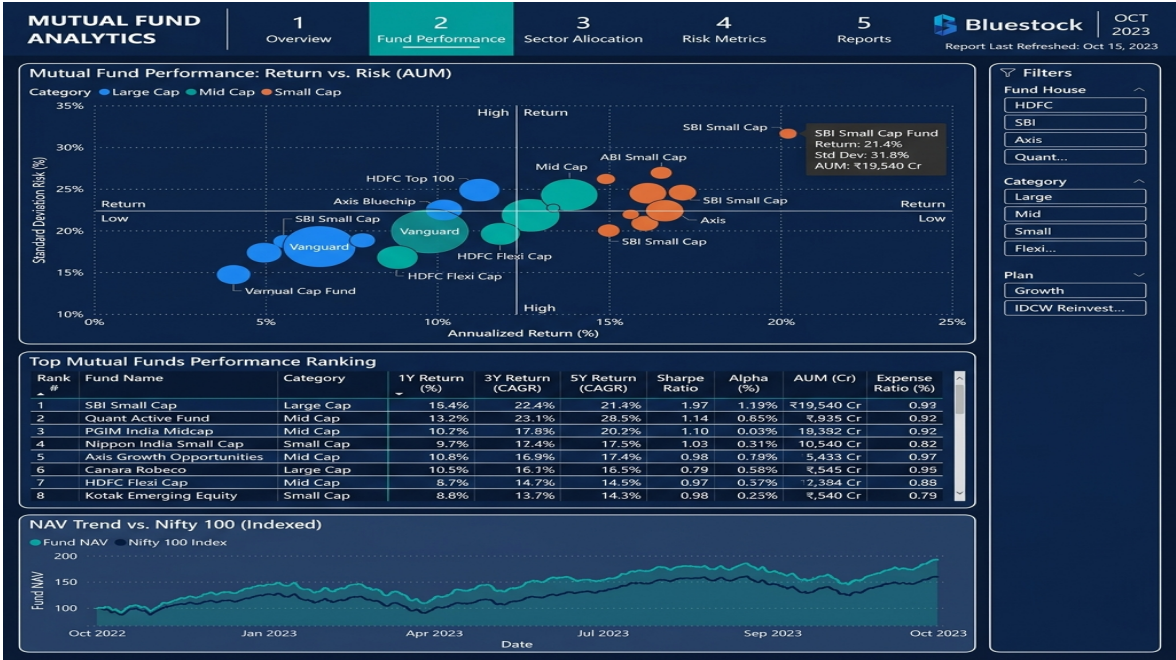

A multi-page conformed PDF document (reports/Dashboard.pdf) containing all landscape pages and a setup guide (reports/PowerBI_Setup_Guide.md) have been successfully compiled in the workspace.

Page 1: Industry Overview

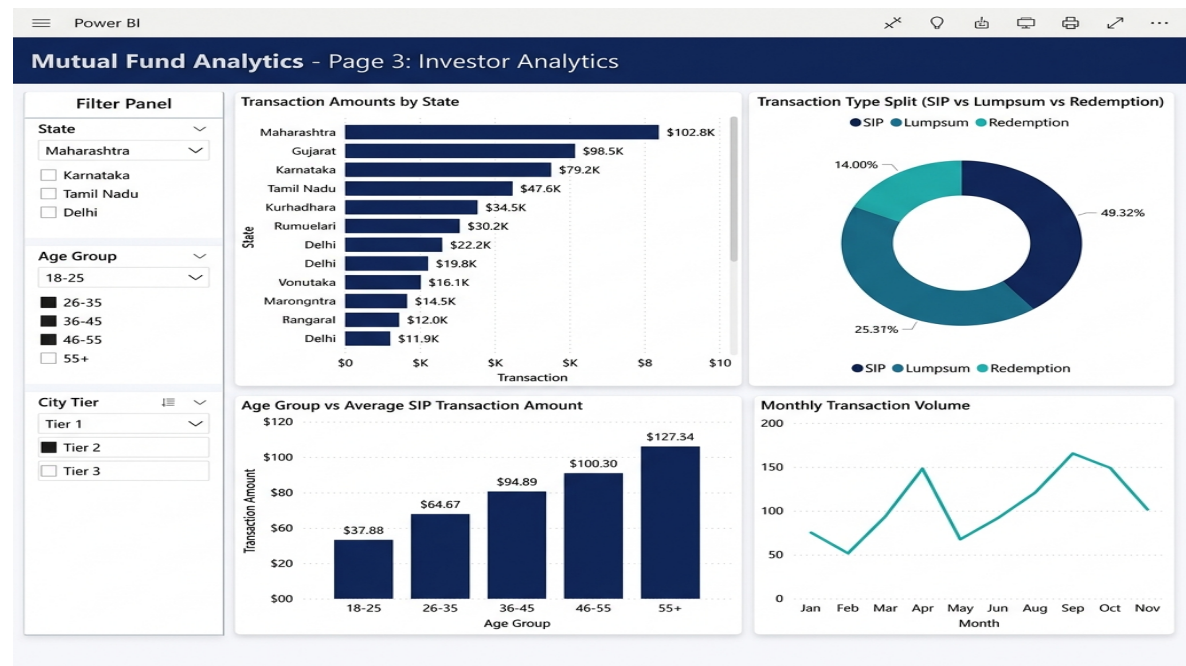

Visual Elements & Insights: Displays corporate KPI cards showing Total AUM of ₹81L Crore, SIP Inflows of ₹31K Crore, Folios of 26.12 Crore, and 1,908 active schemes. A historical line chart documents the growth of industry AUM from 2022 to 2025, alongside a bar chart ranking the top AMCs (SBI, HDFC, ICICI) by total assets under management.

Page 2: Fund Performance

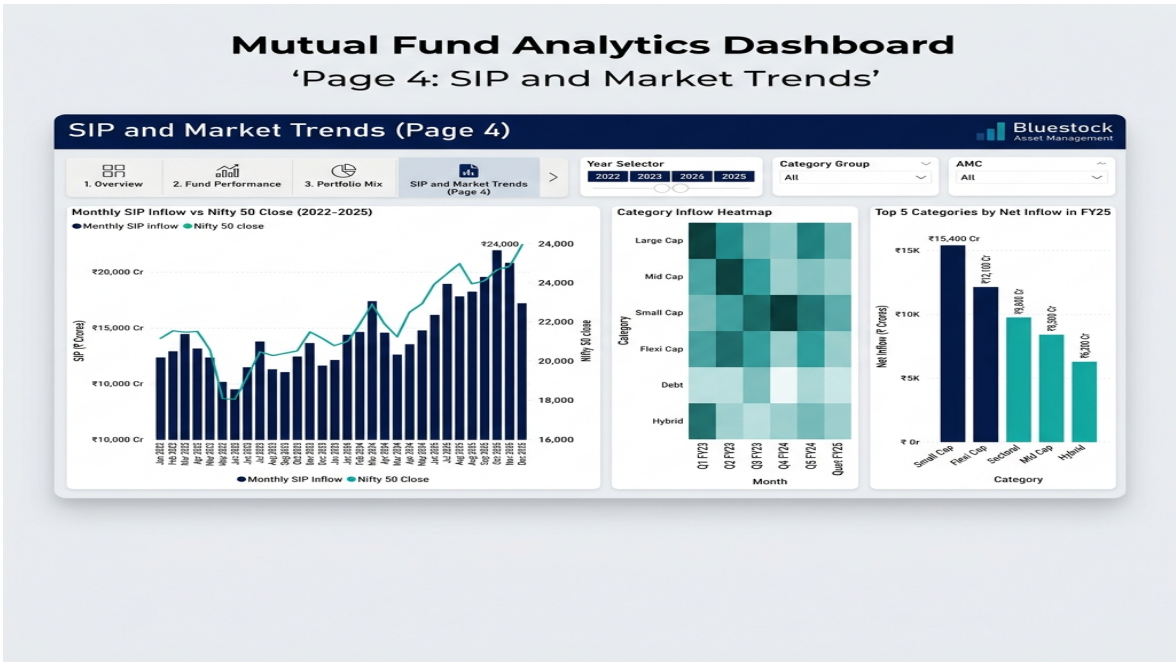

Page 3: Investor Analytics

Visual Elements & Insights: Outlines investor participation by geography and age. Displays transaction values ranked by state (Punjab, Tamil Nadu, and Madhya Pradesh leading), a donut chart of transaction type splits (SIP vs. Lumpsum vs. Redemption), and average monthly SIP amounts across age brackets. Supports tier and state slicers.

Page 4: SIP & Market Trends

Visual Elements & Insights: Illustrates market indicators by comparing monthly SIP inflows (bars) against Nifty 50 close price (line) to explore correlations. A matrix heatmap visualizes monthly inflows across 10 scheme categories, highlighting the peak interest in Small Cap and Flexi Cap schemes.
